

Hey! My Name is Molly and grew up in Castlemaine.

For the last few years I have been studying a double degree in Paramedics and Nursing. I have worked as a nanny in London for families with children of all different abilities and have been a support worker for 3 yrs.

I am really passionate about working in the disability sector as I truly believe everyone has the right to be heard and the right to express themselves. I love having the opportunity to create meaningful connections, promote independence and enable the individuals i work with to express themselves, and to reach their dreams.

In my spare time I enjoy cooking, catching up with friends and family. I have always been active and believe being active in sport is a great way to build great relationships and develop self-confidence, I am a keen long distance runner and play netball.
