

Hi I am Michelle the director of One-care.

When I started One-Care almost 20yrs ago there were not many companies working in the Disability/Aged Care space and therefor we helped out where ever we could but now because of my own experience in trying to find stimulating and meaningful, relevant care for my grandson I made the discussion to narrow the services to centre the support care around the pre teen/ teenager Neurodivergent sector.

In seeing how my grandson has benefitted from involved, young care workers, I want One-Care to replicate exactly that. So we provide support care workers that can facilitate stimulating, interest based, and hands on support for young teens and adolescents.

We provide to each client specialised to their particular needs, wants and schedule, and we strive to provide fun, informative, and learning centred care, as well as fostering a great relationship/ mentorship between your client and our support care workers.

I have lived in the Macedon Ranges for over 40yrs where I have raised my 4 children and now have 12 grandchildren with most living in the Macedon Ranges and Bendigo area. I have been passionately involved in the disability and aged care sector for almost 20yrs providing cleaning, personal care and support to clients and their families.

When I'm not at work I enjoys hanging out with her grandkids, our Groodle Charlie and our Spoodle Daisy. I also enjoy shopping, mostly garden nurseries these days, and spending time with family.
